

Guidelines for Conducting Drive-In Services

You may conduct drive-in services under the following conditions:

- All attendees will remain in their vehicles with their windows up.
- The audio of the service will be transmitted, ideally through use of a low-wattage FM radio transmission that attendees can access on their car radios.
- There will be no distribution of the Eucharist at this time.
- There will be a minimum number of participants in the service; they will be masked, except when speaking.
- The same limitations on music still apply, although those who attend may sing in their cars with the windows up.
- Service bulletins should be made available digitally, so there is no need to hand out paper bulletins.
- There will be no physical interaction between anyone participating in or attending the service.
- Online services will continue to be offered.
- You have sent a write-up of your plan for your service to bishopsoffice@thediocese.net. It will be reviewed and you will be contacted with any questions. You will be notified if your plan is satisfactory.
